APPENDIX A - GROUP LOG 28

1. Introduction

1.1 Purpose

The purpose of this document is to provide users with a comprehensive guide to the features and functionalities of the **Campus Connect** platform. It outlines the steps required to perform various actions such as managing the admin panel, signup, login, course management, project applications, discussions, and account management. This document is intended to help users efficiently navigate and utilize the platform. Additionally, it serves as a reference for resolving common issues and understanding system workflows, enabling users to make effective use of all available features.

1.2 Software Overview

Campus Connect is a web-based platform designed to enhance interaction and collaboration between students and professors within a campus environment. It provides features such as course management, anonymous class discussions, project listings and applications, community forums, and feedback analytics. The platform enables professors to manage courses, post projects, and review student applications, while students can participate in discussions, apply for projects, and track their progress. By centralizing these functionalities, Campus Connect improves communication, transparency, and overall academic engagement.

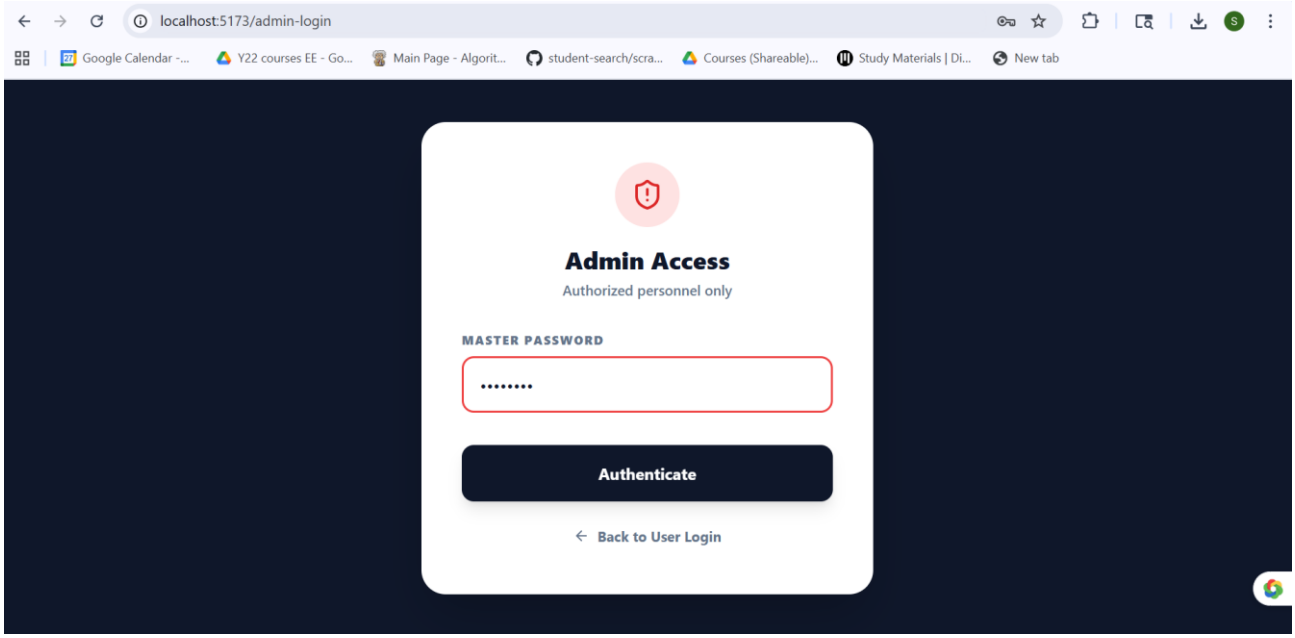
1.3 Intended Audience

This user manual is intended for **students, professors, and administrators** who use the Campus Connect platform. It provides clear guidance on how each user role can access and utilize the system's features effectively, including course participation, project management, forum interactions, and account management.

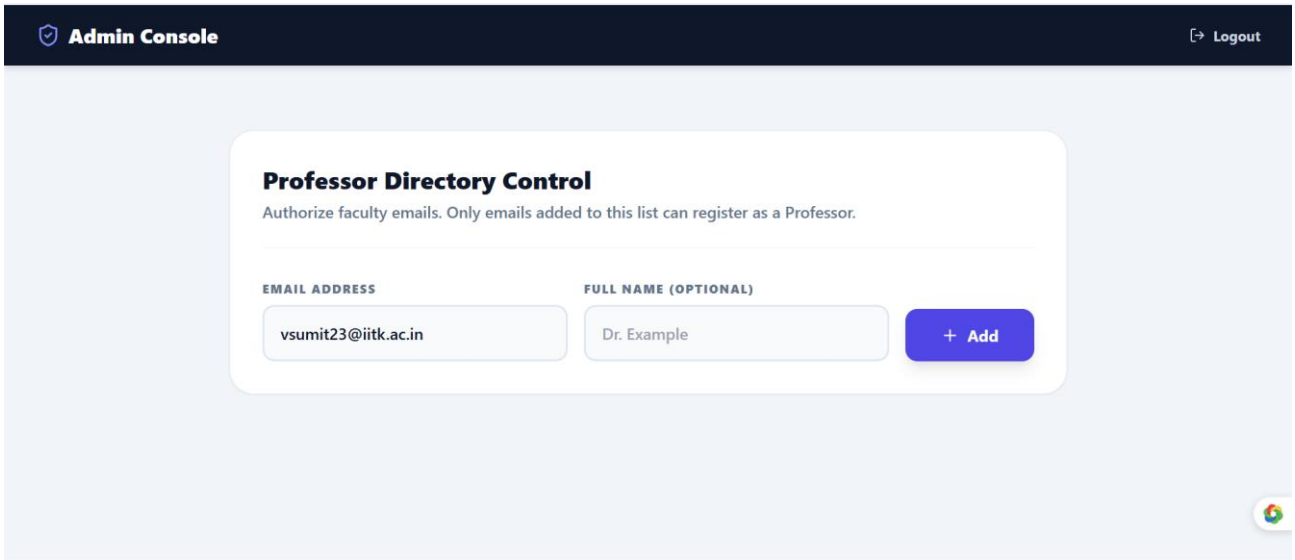
2. Admin Panel

1.1 Professor Authorization

To access the admin panel, navigate to the **/admin-login** route. Enter the administrator password (currently set as **admin123**) and click on Authenticate to proceed.



Upon successful authentication, you will be redirected to the **Admin Dashboard**. Here, you can authorize professors by entering their email ID, along with an optional name. After filling in the details, click on the **Add** button.



Once added, the provided email ID becomes eligible for professor registration. Any user with this authorized email can now sign up as a professor on the platform.

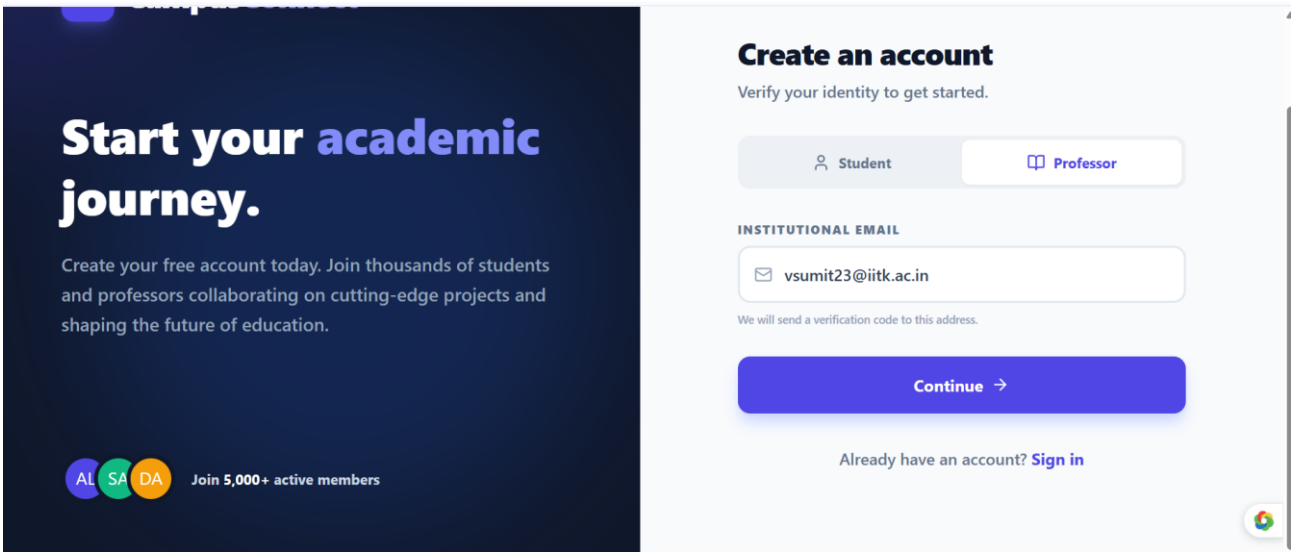
3. Registration and Login

3.1 Registration

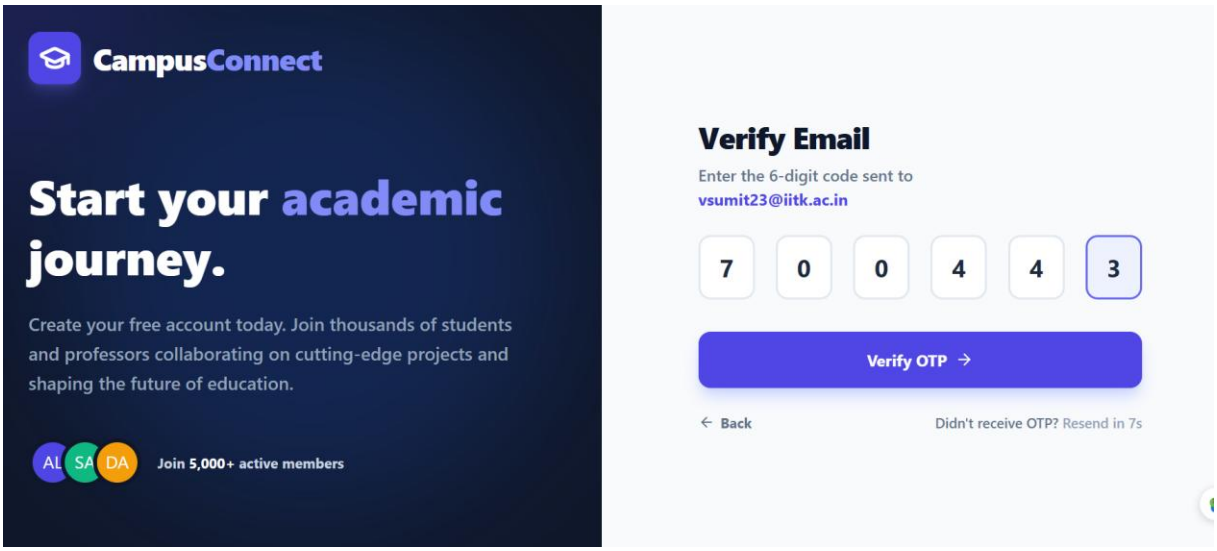
The system provides separate registration processes for **Students** and **Professors**, ensuring secure and role-based access.

3.1.1 Professor Registration

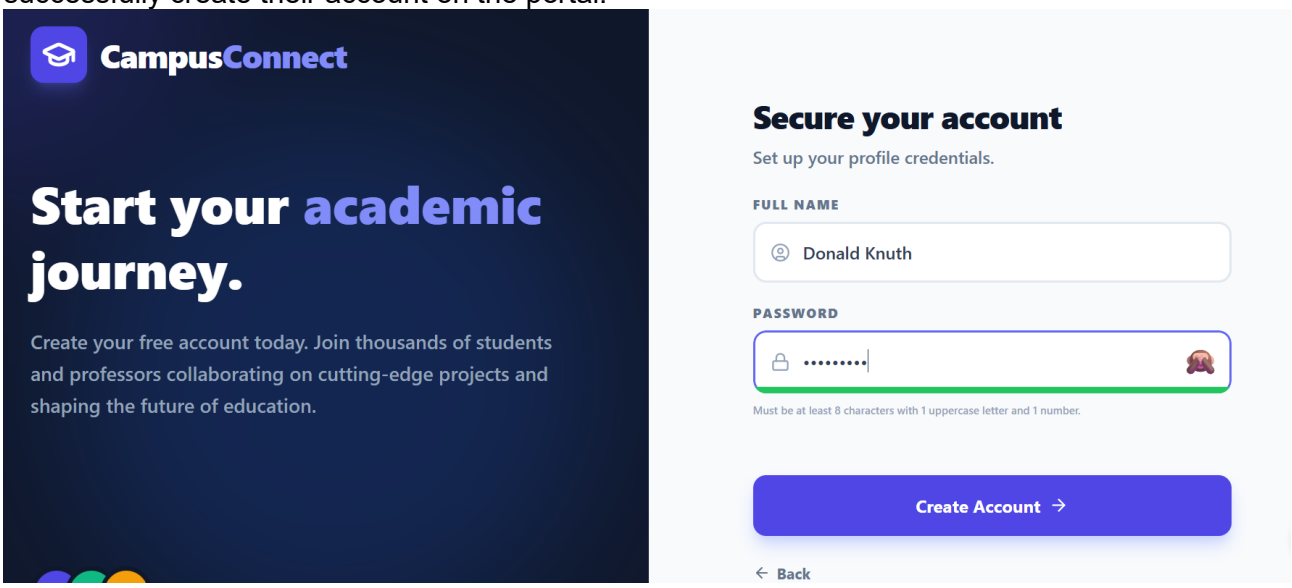
To register as a professor, navigate to the **Sign Up** page and select the professor option.Only professors whose email IDs have been added by the administrator are allowed to register.The user must enter their IITK **email ID** and click on continue button.



After clicking the continue button,the user is redirected to the OTP Verification page, where an OTP is sent to his email id. The user must enter the correct OTP to proceed. The user has the option to resend the OTP after 30 seconds. If the entered OTP is incorrect, the website will prompt an error message and allow the user to retry or re-register if needed.

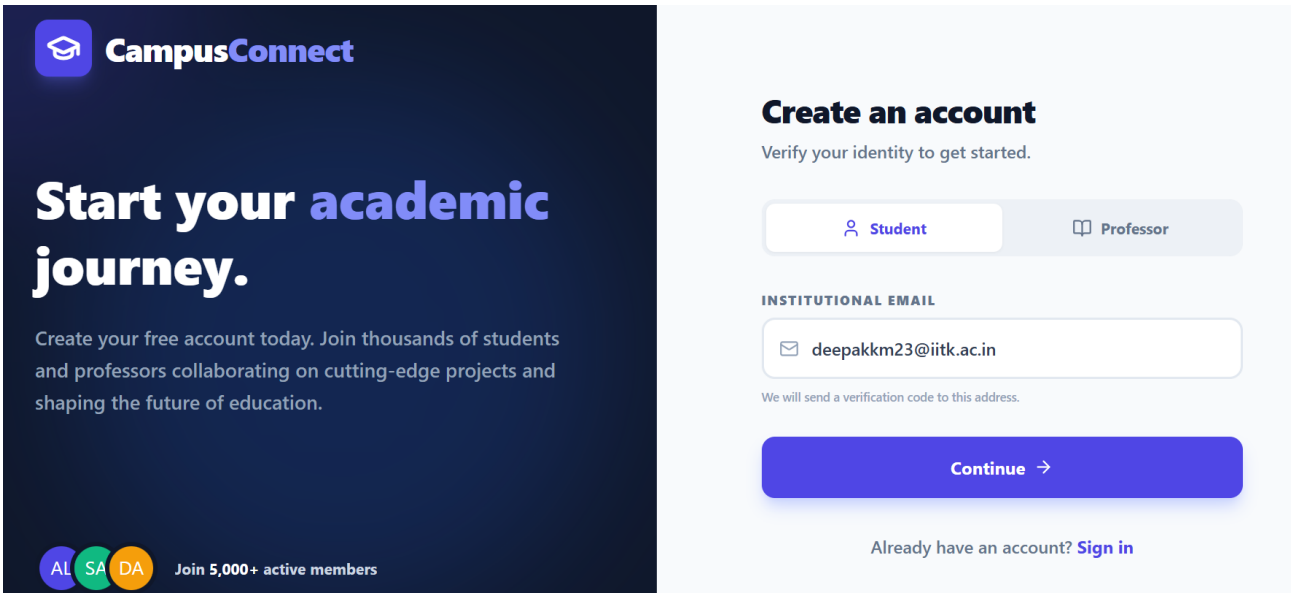


After entering the correct OTP, the user is redirected to the Profile Details Page, where they must provide additional information to complete the registration. The required fields include **Full Name** and **password**. After filling in the details, the user must click the **Create Account** button to successfully create their account on the portal.

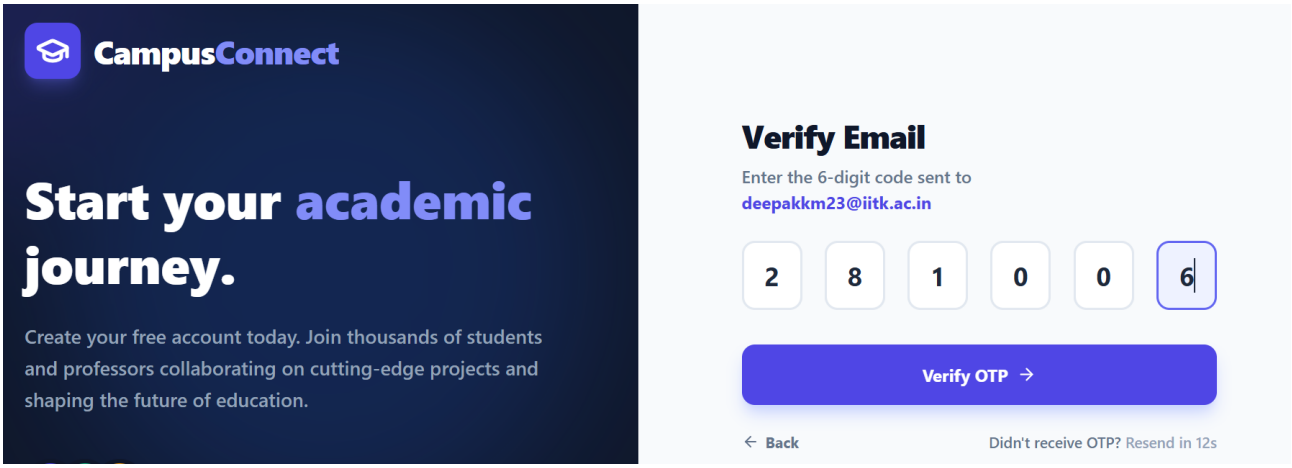


3.1.2 Student Registration

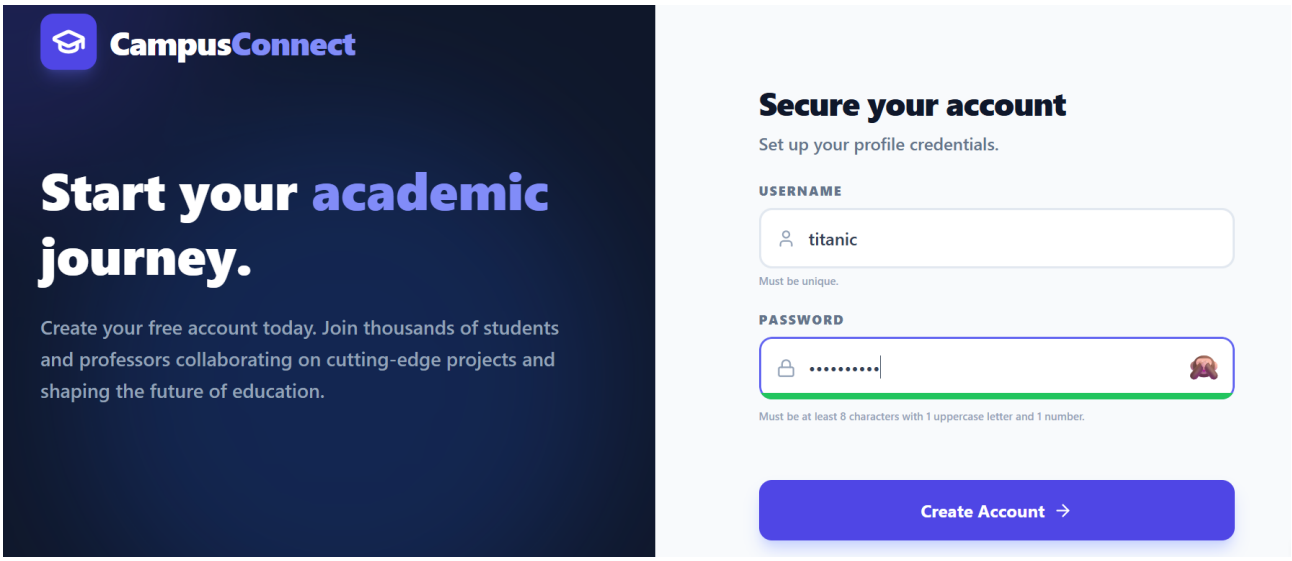
To register as a student, navigate to the **Sign Up** page and select the student option. The user is required to enter their IITK **email ID** and click on continue button



After clicking the continue button,the user is redirected to the OTP Verification page, where an OTP is sent to his email id. The user must enter the correct OTP to proceed. The user has the option to resend the OTP after 30 seconds. If the entered OTP is incorrect, the website will prompt an error message and allow the user to retry or re-register if needed.

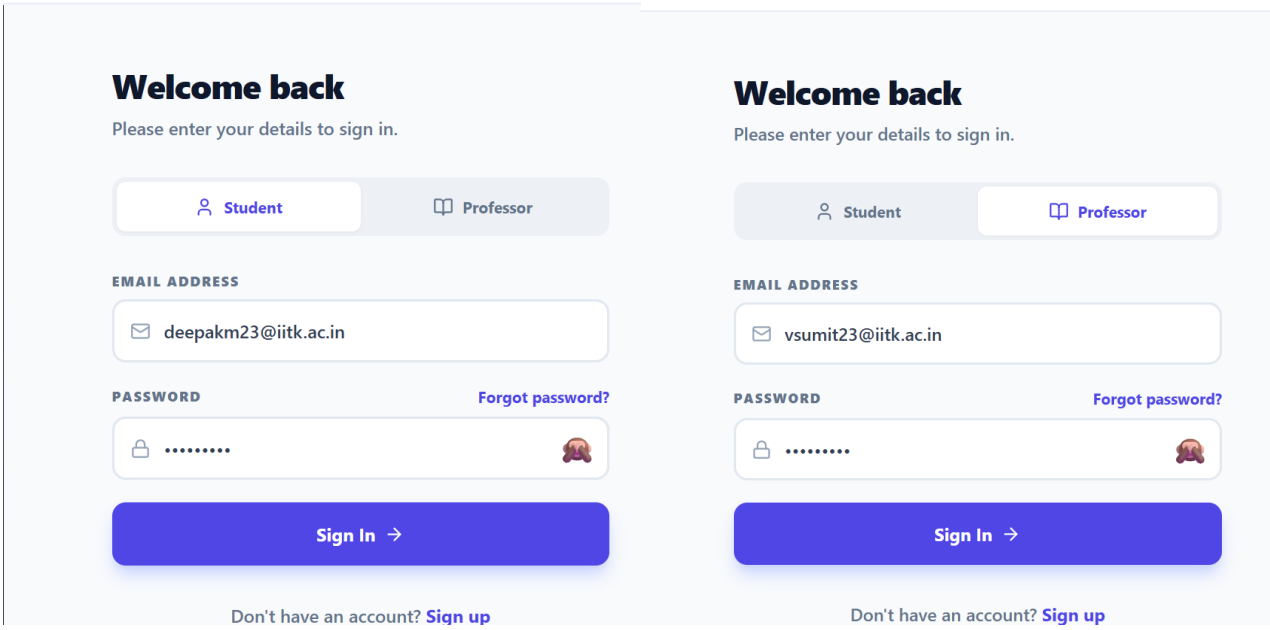


After entering the correct OTP, the user is redirected to the Profile Details Page, where they must provide additional information to complete the registration. The required fields includes **anonymous username** and **password**. After filling in the details, the user must click the **Create Account** button to successfully create their account on the portal.



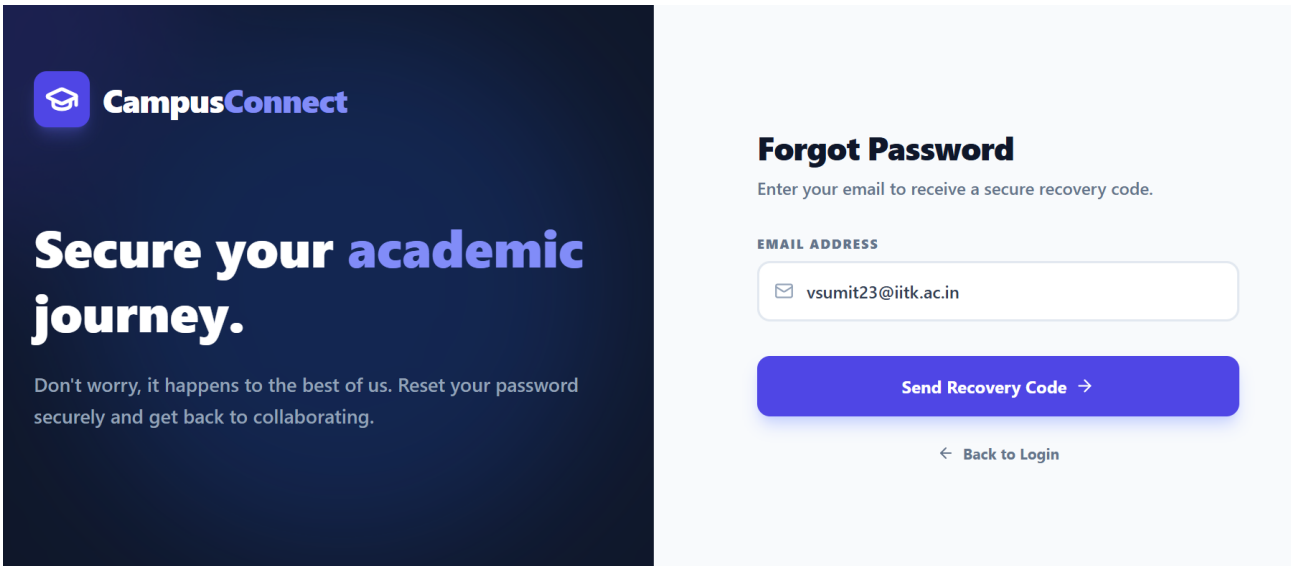
3.2 Sign In

To access the platform, users need to navigate to the **Sign In** page and select their **role (Student or Professor)**. After selecting the appropriate role, the user must enter their **registered email ID** and **password** and click on **Sign-In** button. Upon successful authentication, the user is redirected to their respective dashboard based on the selected role.

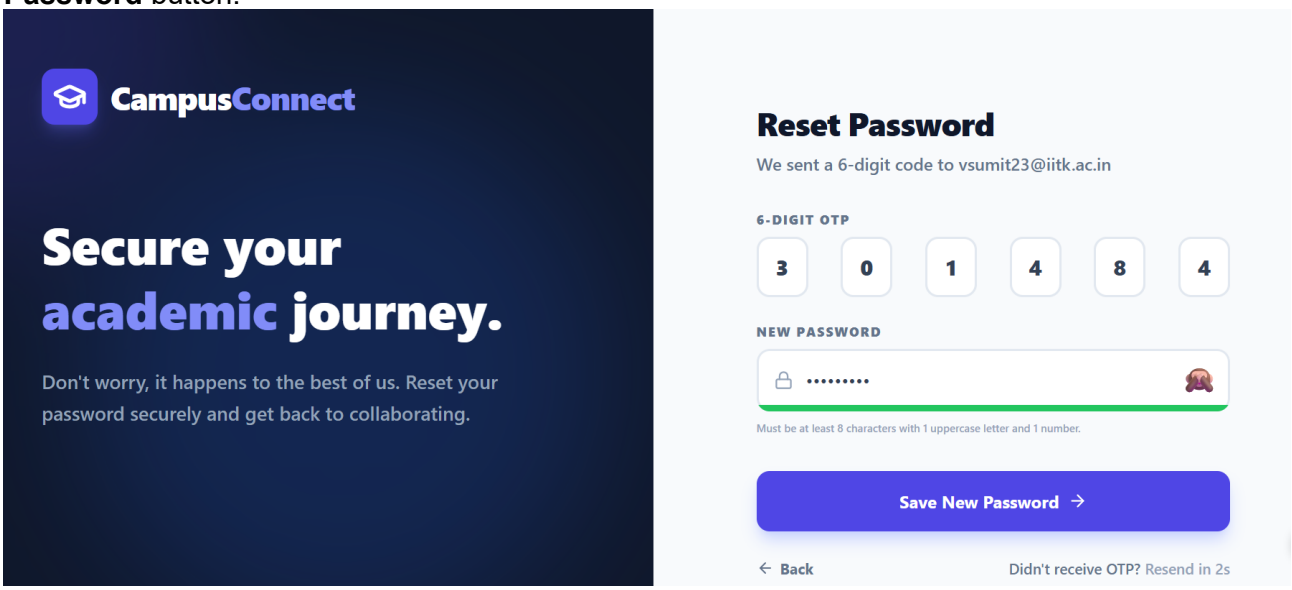


3.3 Forgot Password

If the user forgets their password, they can click the **Forgot Password** button on the Sign In page. Upon clicking, they will be directed to a page where they must enter the **email** used during registration and click on **Send Recovery Code** button.After this, an OTP will be sent to that email.



The user must enter the correct OTP and then set a **New Password** and click on the **Save New Password** button.

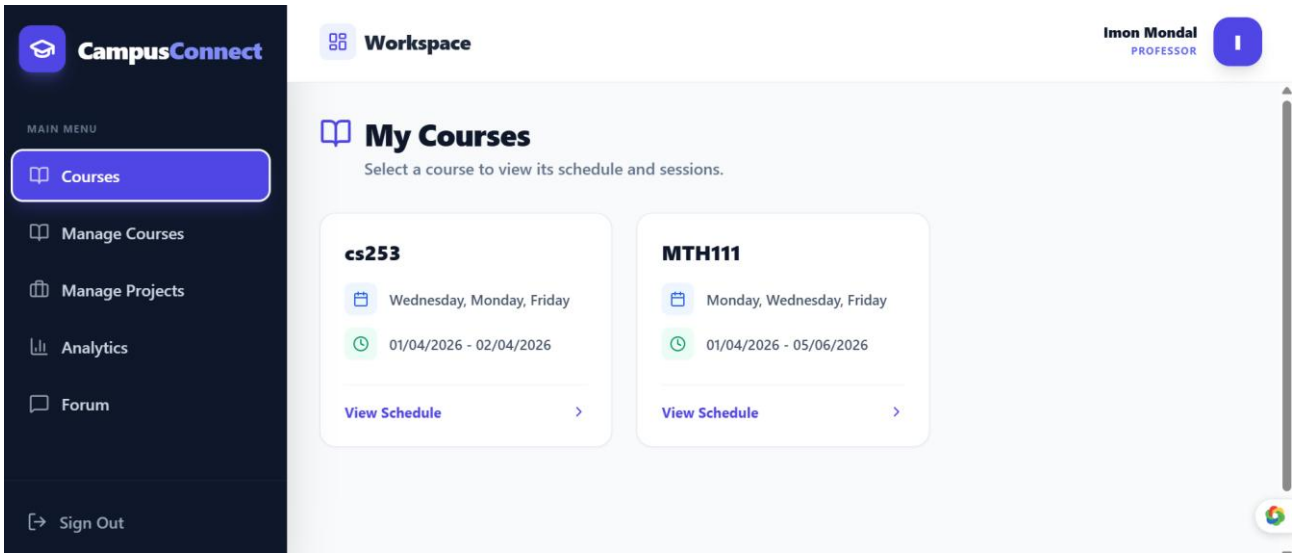


Once the new password is set, the user will be redirected back to the Sign In page, where they can log in using their username and the newly created password.

4. Dashboard

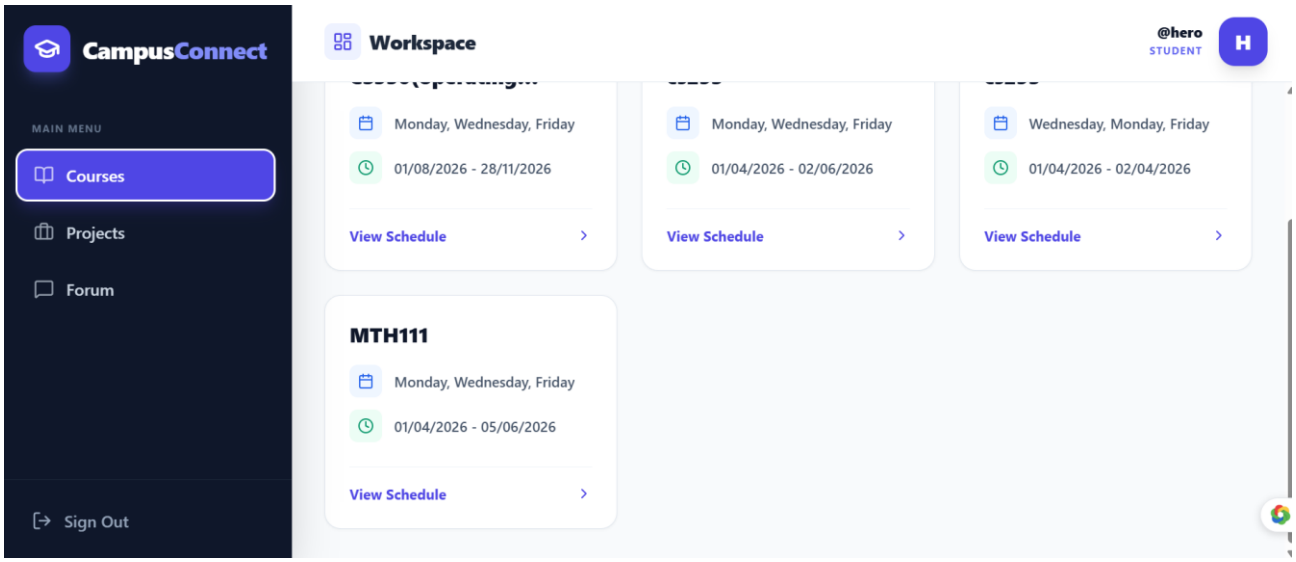
The dashboard provides a centralized interface to access and manage different features of the platform. The sidebar menu contains various sections that allow users to navigate through the system efficiently

4.1 Professor Dashboard



- **Courses**: Displays all courses created or taught by the professor. Each course shows its schedule, duration, and sessions.
- **Manage Courses**: Allows professors to create new courses, schedule classes, and manage existing course details.
- **Manage Projects**: Enables professors to create, edit, and manage project listings, as well as review student applications.
- **Analytics**: Provides graphical insights based on student feedback, helping professors evaluate course performance.
- **Forum**: Allows professors to participate in discussions, create posts, and interact with students.
- **Sign Out**: Logs the professor out of the system securely.

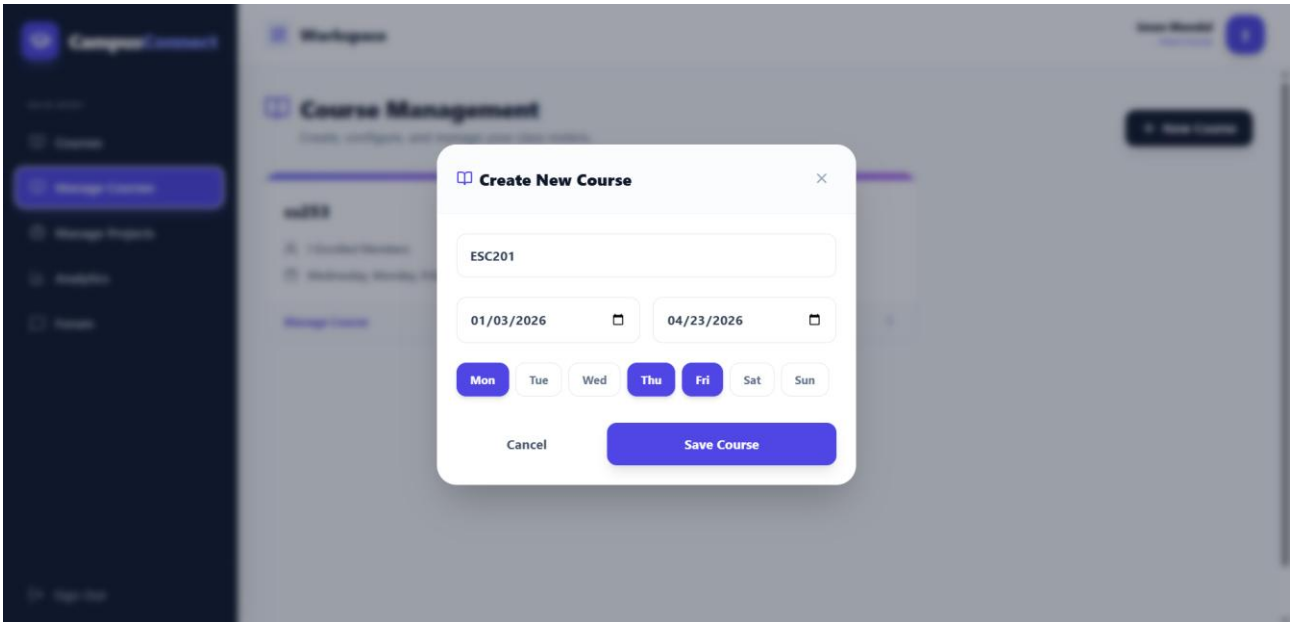
4.2 Student Dashboard



- **Courses**: Displays all courses in which the student is enrolled, along with schedules and session details.
- **Projects**: Allows students to browse available projects, apply for them, and track application status.
- **Forum**: Provides access to the community forum for discussions, posts, and interactions.
- **Sign Out**: Logs the student out of the system securely.

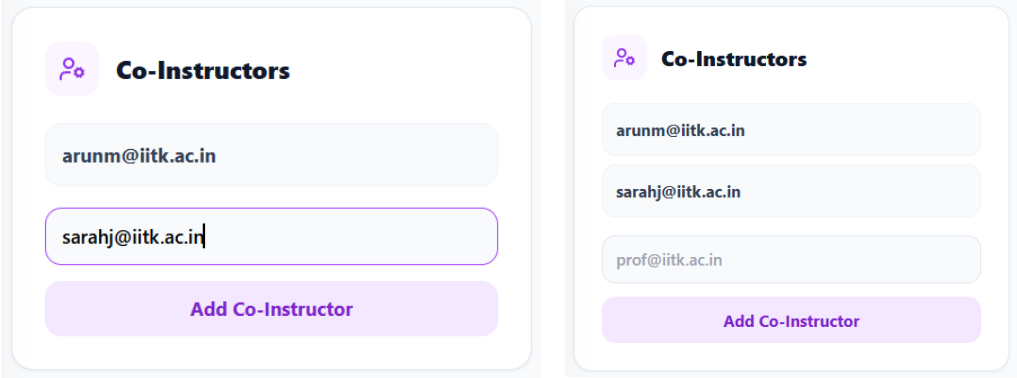
5. Course Management (Professor)

5.1 Course Creation



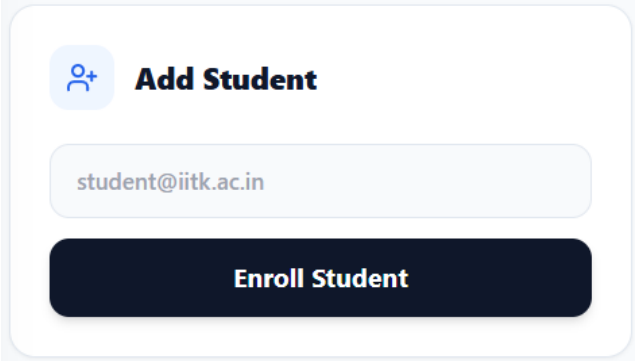
- Navigate to the **Manage Courses** tab in the sidebar.
- Click the **+ New Course** button in the top right.
- Fill in the **Course Code** and **Duration**.
- Select the specific **Days of the Week** for the classes.
- Click **Save Course** to finalize.

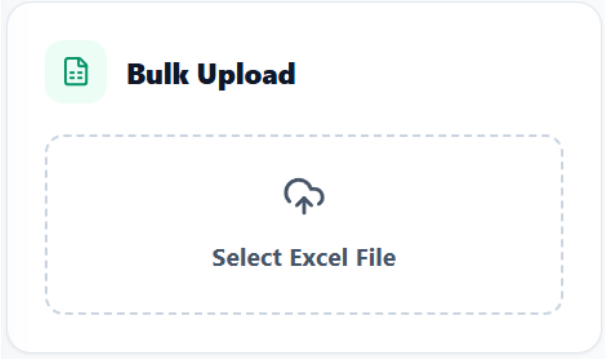
5.2 Add Co-instructor



- Locate the **Co-Instructors** panel within the specific course management view.
- Enter the official **IITK email address** (e.g., sarahj@iitk.ac.in) of the faculty member you wish to add in the text field.
- Click the **Add Co-Instructor** button to grant them administrative access to the course.
- Once added, the email will appear in the list above the input field, confirming the user has been successfully assigned.

5.3 Add Students





There are two ways to enroll students into a course:

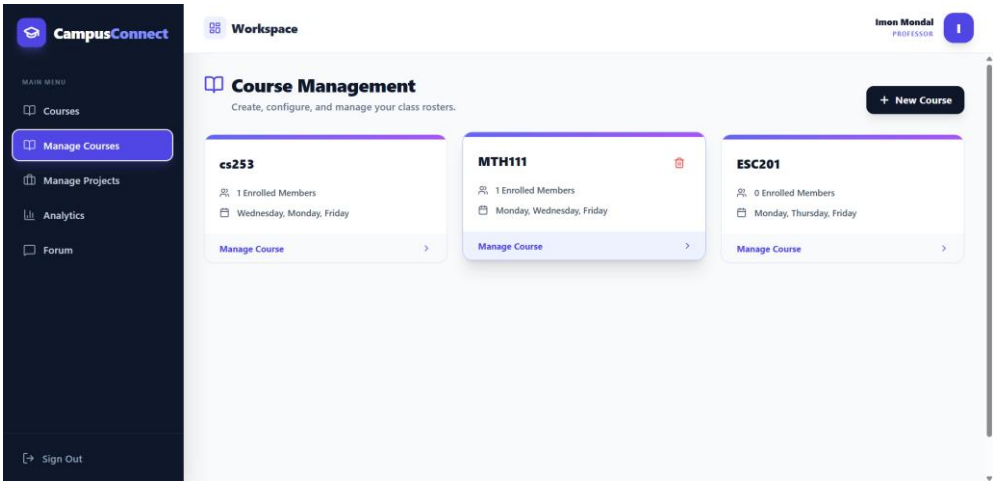
1. Individual Enrollment

1. Locate the **Add Student** card on the dashboard.
2. Enter the student's official **IITK email address** in the input field.
3. Click the **Enroll Student** button to add them to the course roster immediately.

2. **Bulk Upload via Excel**

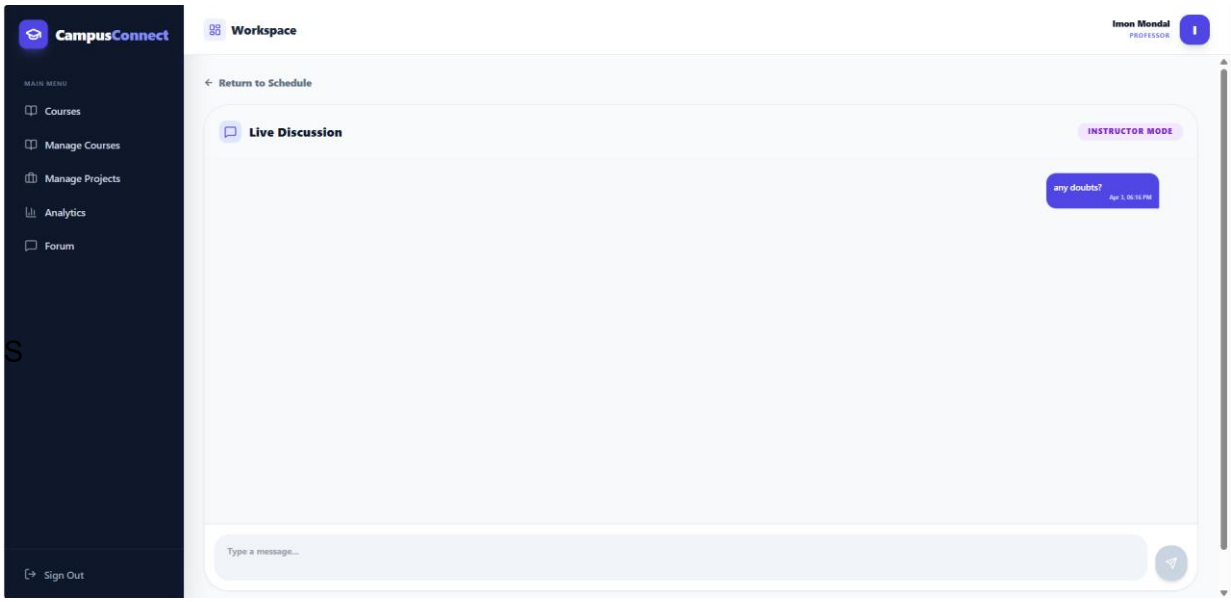
1. Locate the **Bulk Upload** card.
2. Click on the **Select Excel File** area to open your file explorer.
3. Choose the relevant .xlsx or .csv file containing the list of student emails.
4. Once the file is uploaded, the system will automatically process the list and enroll all valid students found in the document.

5.4 Course Deletion



- Navigate to the **Manage Courses** section using the sidebar menu.
- Locate the specific course card you wish to remove from the dashboard.
- Click the **Red Trash Can (Delete) Icon** located in the top-right corner of the course card (as seen on the MTH111 card).

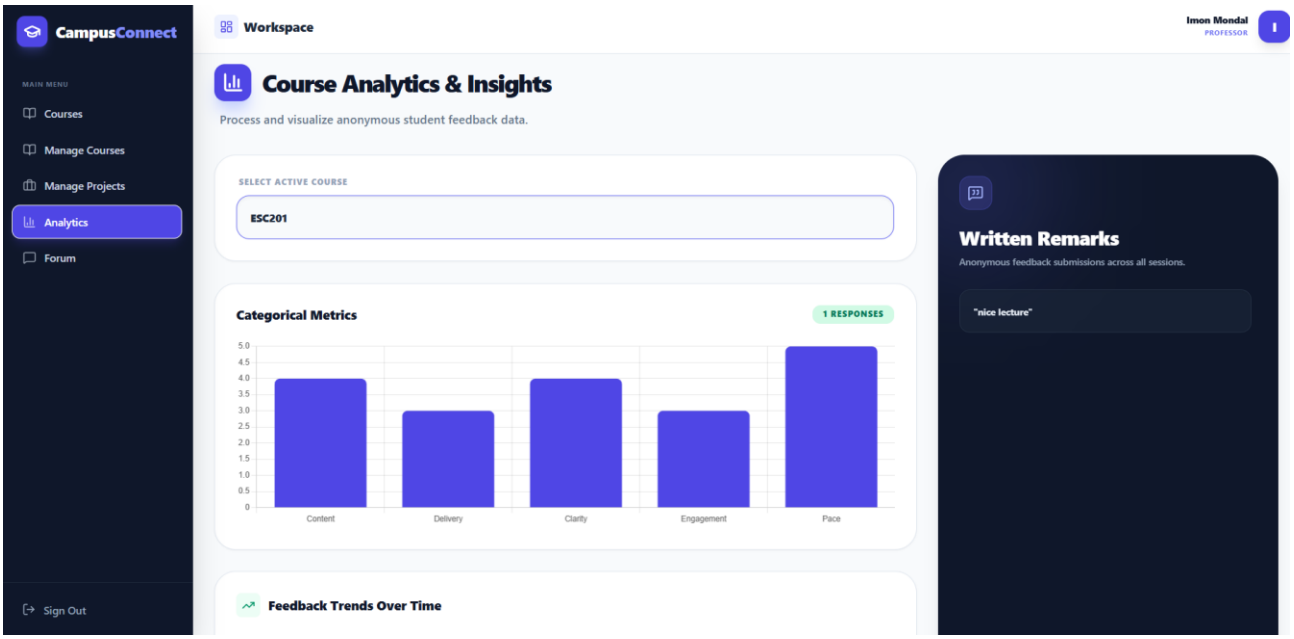
5.4 Accessing Chat



S

- Select **Courses** from the main sidebar menu to view your active course list.
- Click on the specific **Course Card** you wish to enter.
- From the course schedule, select the **Lecture** for which you want to access the discussion.
- You will be directed to the **Live Discussion** interface, where you can view message history and real-time interactions.
- To participate, enter your text into the **"Type a message..."** field at the bottom and click the **Send (Plane) icon.**

5.5 Course Analytics

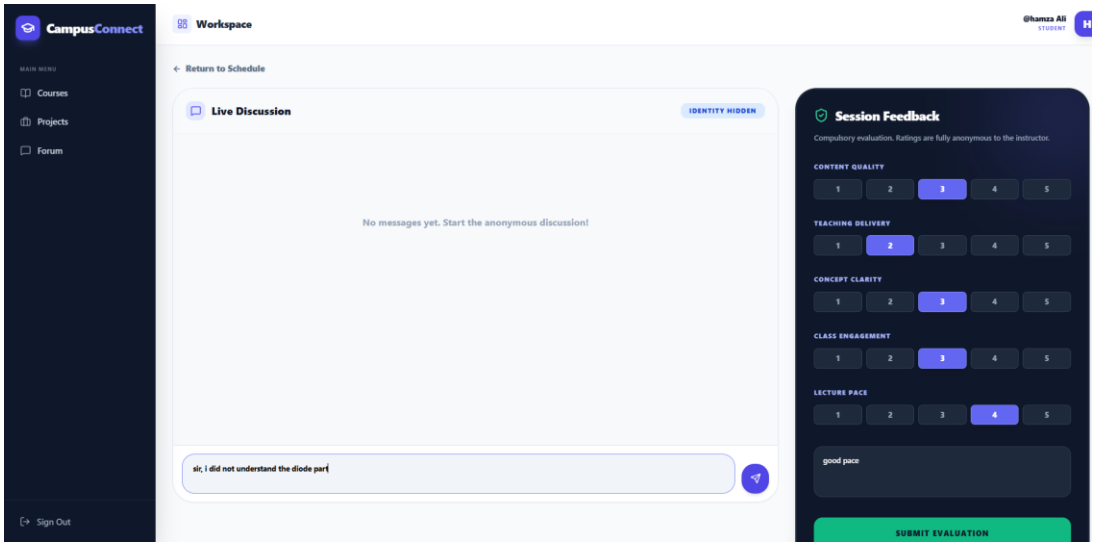


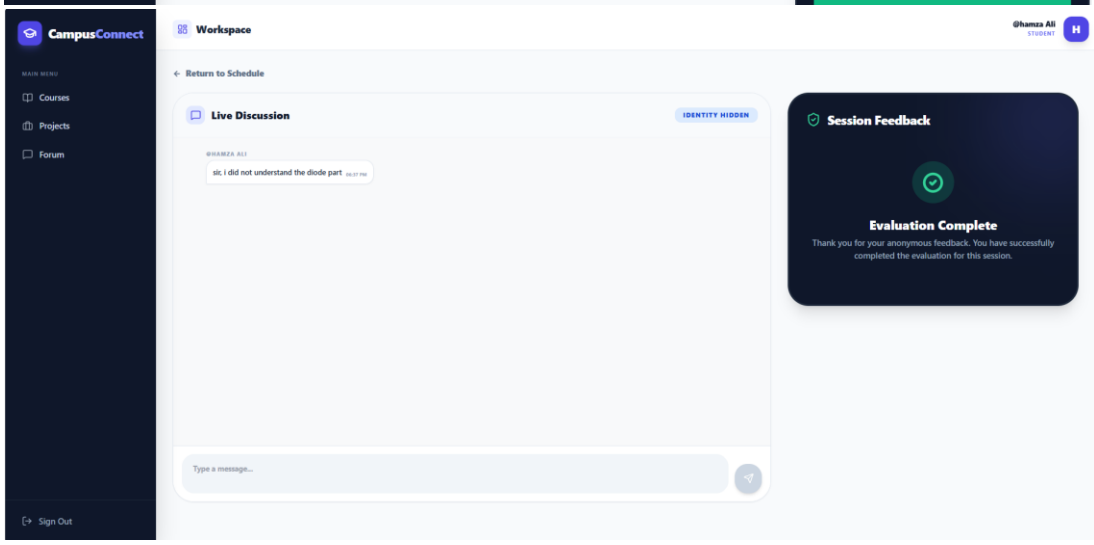
The Analytics dashboard provides a visual summary of student feedback, helping instructors identify strengths and areas for improvement in their teaching process.

- Click on the **Analytics** tab in the main sidebar menu.
- Use the **Select Active Course** dropdown menu to choose the specific course (e.g., ESC201) you wish to analyze.
- **Categorical Metrics:** Review the bar chart to see how students have rated the following five key areas on a scale of 1 to 5:
    1. **Content:** The quality and relevance of the material covered.
    2. **Delivery:** The effectiveness of the presentation and teaching style.
    3. **Clarity:** How well the concepts were explained and understood.
    4. **Engagement:** The level of student interaction and interest.
    5. **Pace:** The speed at which the material is being taught.
- **Written Remarks:** View the panel on the right to read qualitative, anonymous comments provided by students across all sessions for a more detailed understanding of their feedback.
- **Feedback Trends Over Time:** Scroll down to the bottom of the page to see how these metrics fluctuate throughout the semester.

6. Course Management (Student)

6.1 Accessing Chat and Feedback





This interface allows students to engage in real-time discussions and provide session-specific feedback anonymously.

A. Live Discussion & Doubts

- Navigate to the **Courses** section and select the current lecture.
- Use the **Live Discussion** panel to type questions or comments in the text field at the bottom.
- Click the **Send (Paper Plane)** icon to post your message.
- **Note:** Your identity is protected by the **Identity Hidden** protocol, ensuring you can ask questions freely without hesitation.

B. Session Feedback

To ensure continuous improvement of the teaching process, students are required to complete a brief evaluation for each session:

- On the right-hand **Session Feedback** panel, rate the following categories on a scale of **1 to 5:**
    1. **Content:** The quality and relevance of the material covered.
    2. **Delivery:** The effectiveness of the presentation and teaching style.
    3. **Clarity:** How well the concepts were explained and understood.
    4. **Engagement:** The level of student interaction and interest.
    5. **Pace:** The speed at which the material is being taught.
- Add any qualitative comments in the **text box** (e.g., "The pace was perfect, but the diode section needs more examples").
- Click **Submit Evaluation**.
- Once submitted, the panel will display **"Evaluation Complete,"** confirming your feedback has been recorded.

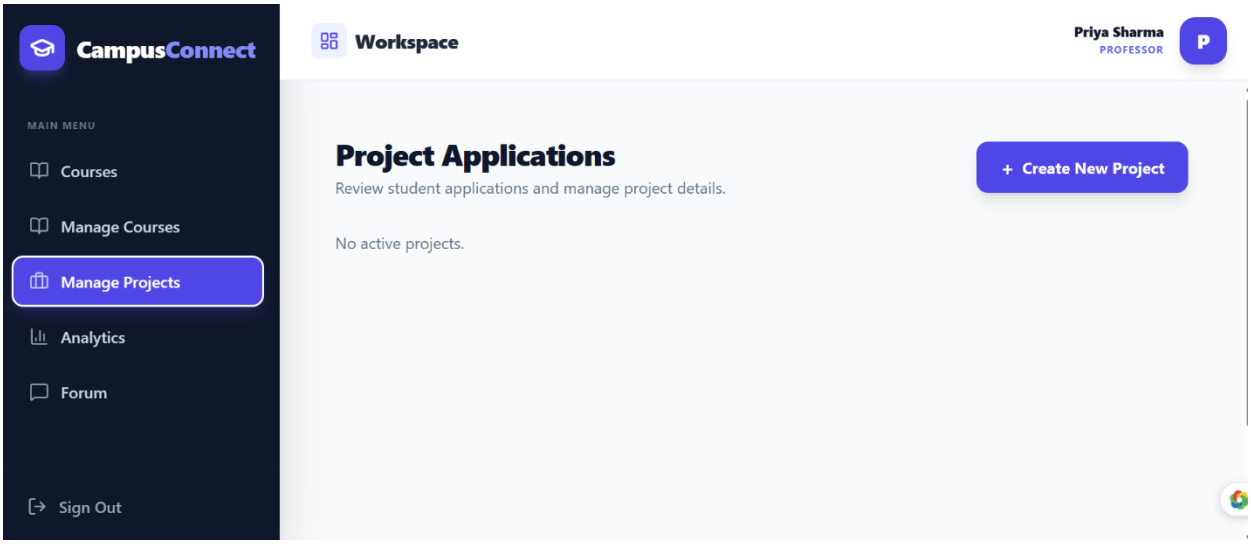
Identity Protection: Your name and roll number are never shared with the instructor during live chats or in the feedback analytics.

7. Project

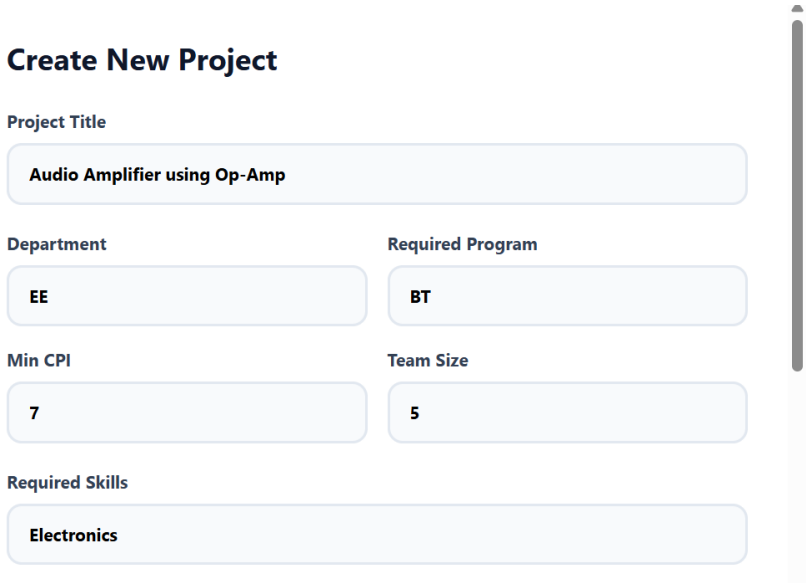
7.1 Professor - Project Management

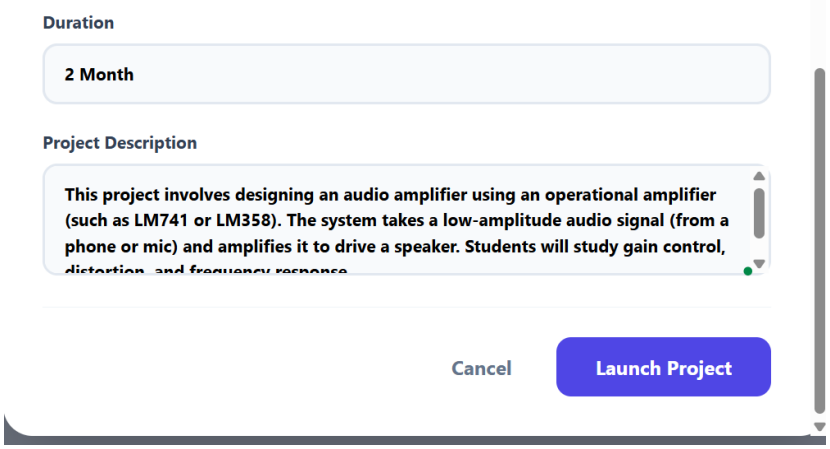
7.1.1 Creating a New Project

Professors can create a project by navigating to the **Manage Projects** section from the dashboard and clicking on the Create New Project button.

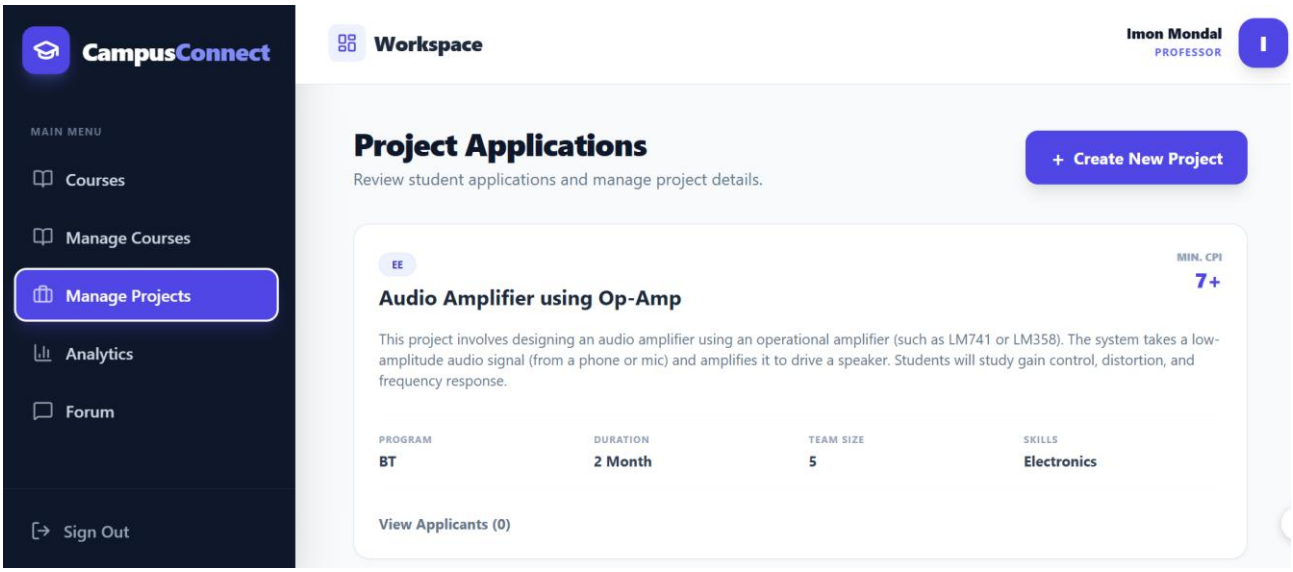


After this they are required to enter the **Project title, Department, Required Program, Minimum CPI requirement,Team Size,Required Skills,Duration of Project** and **Project Description** and then publish the project using **Launch Project** button.



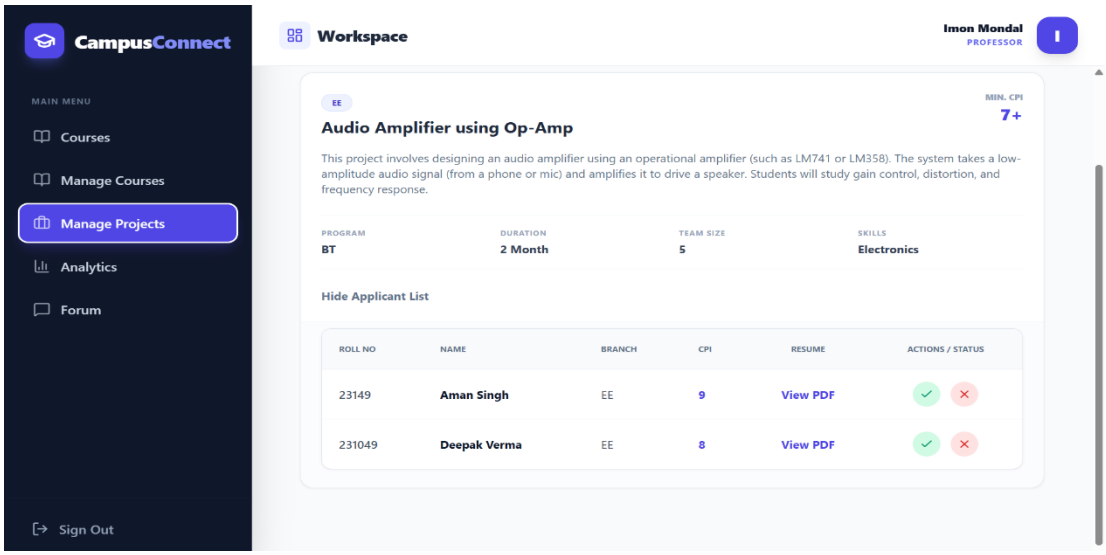


Once posted, the project becomes visible to students and also to the professor.

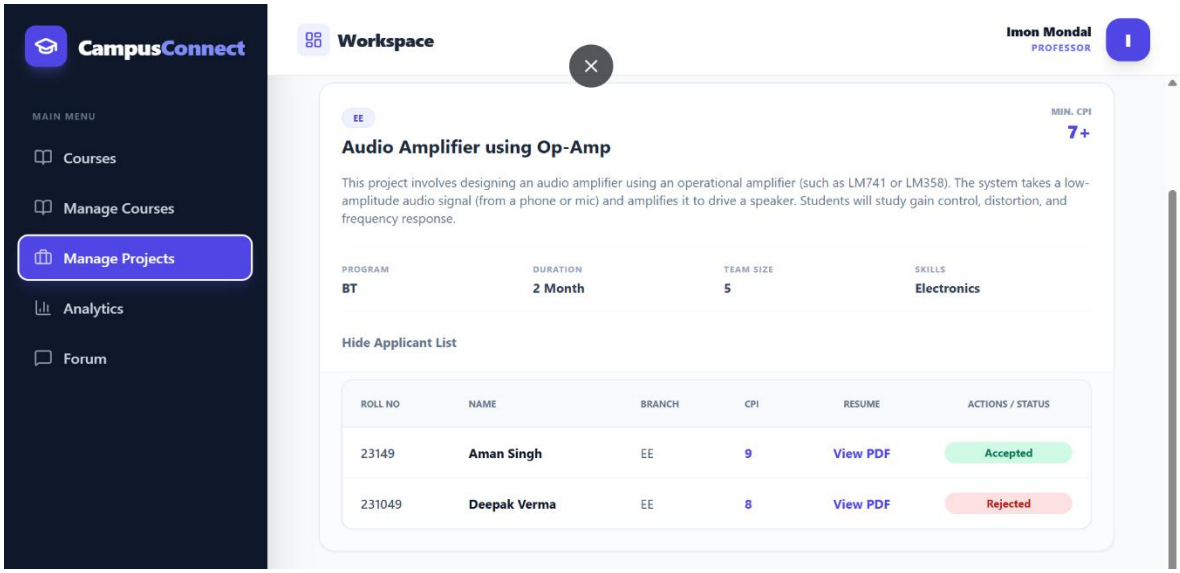


7.1.2 Managing a Project

Professors can **view all applications** received for a project by expanding the **View Applicants**, access detailed information of each applicant **including their resume**, and take action by **accepting** or **rejecting** the applications.



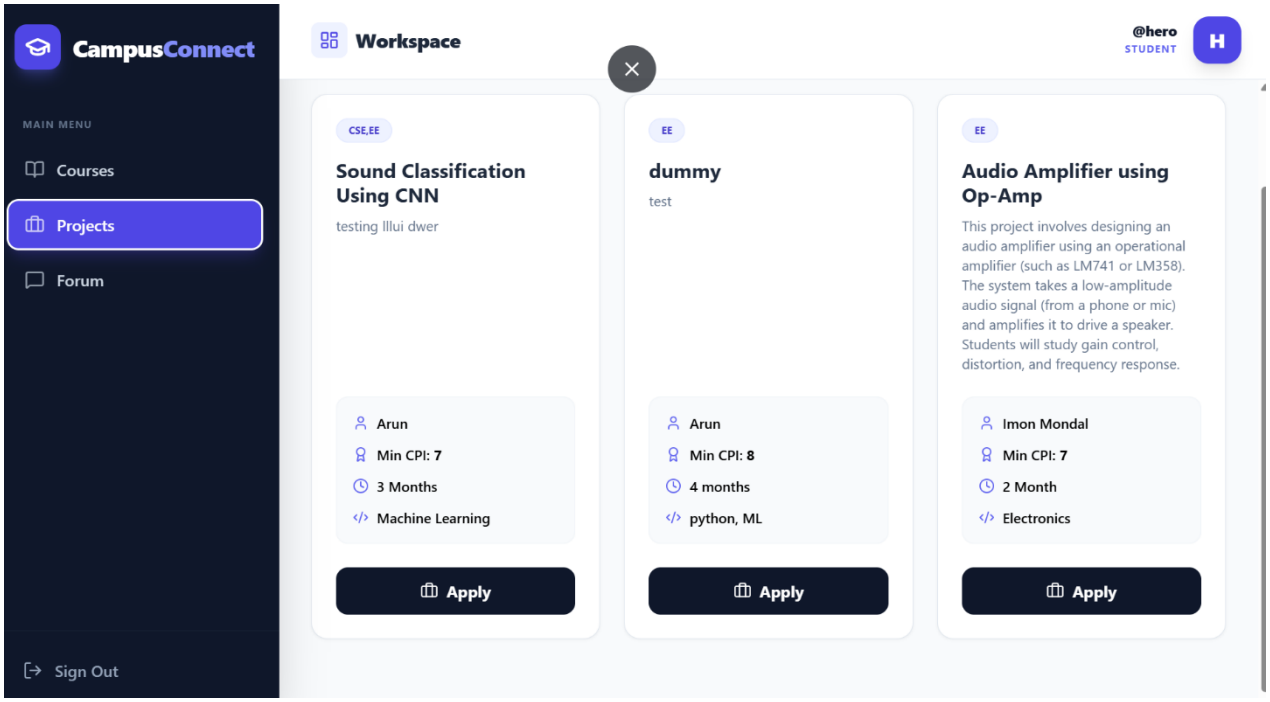
The selected decision is recorded and automatically reflected in the respective student's account and also in professor account.



7.2 Student - Project Management

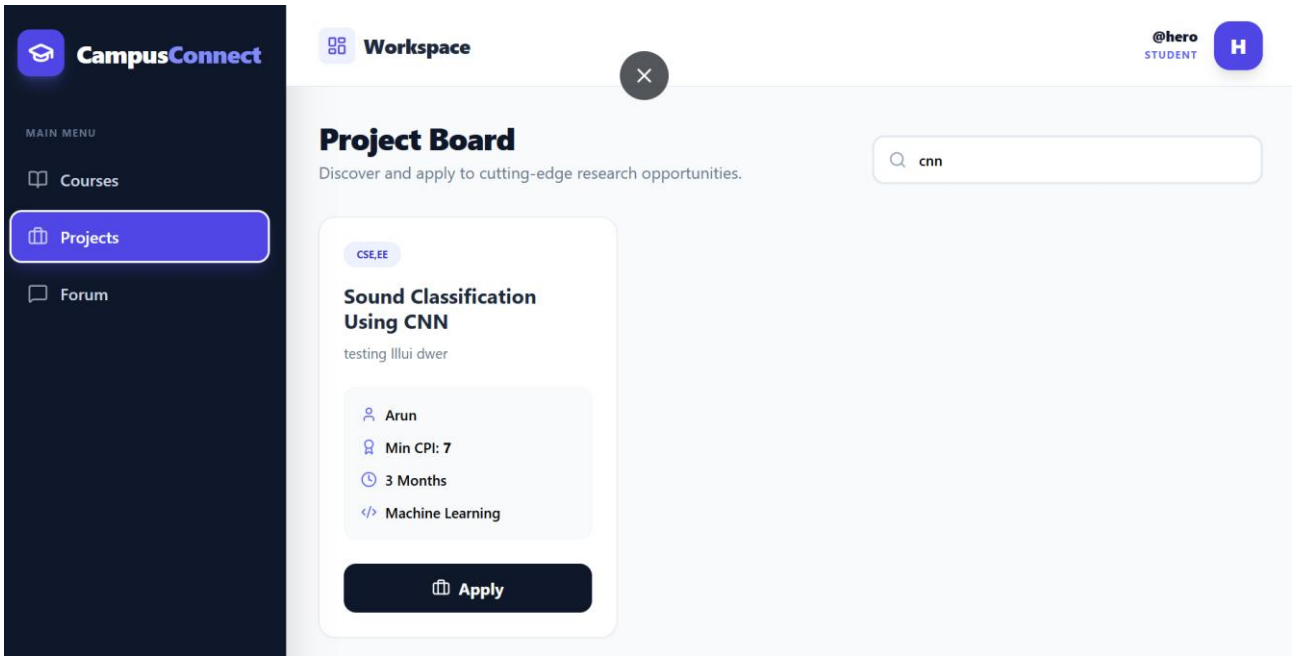
7.2.1 Viewing Projects

Students can **view** all available projects in the **Project** menu, where each project is listed with its relevant details.



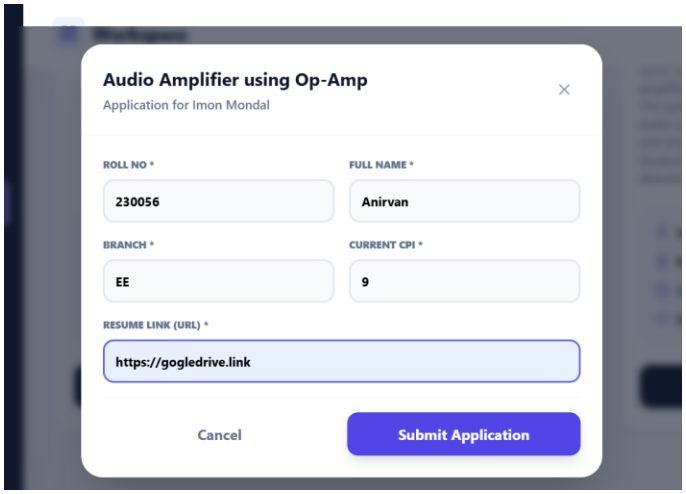
7.2.2 Searching Projects

The system also provides a search functionality that allows users to **find specific projects** easily by entering keywords such as the **project title** or **required skills**.



7.2.3 Applying for Projects

Students can apply for projects by navigating to the Project menu and browsing through the list of available projects. They can apply to a project by clicking on the **Apply** button. They are required to fill in details such as **name, roll number, branch, and CPI**, and provide the like of their **resume** and click on **Submit Application** button . Once submitted, the application is stored successfully in the system.



7.2.4 Tracking Application Status

Students can **track** their a**pplication status** by accessing the Project Menu and viewing their submitted applications. The system displays the status of each application as **Pending**, **Accepted**, or **Rejected**, depending on the action taken by the professor.

Audio Amplifier using Op-Amp
This project involves designing an audio amplifier using an operational amplifier (such as LM741 or LM358). The system takes a low-amplitude audio signal (from a phone or mic) and amplifies it to drive a speaker. Students will study gain control, distortion, and frequency response.

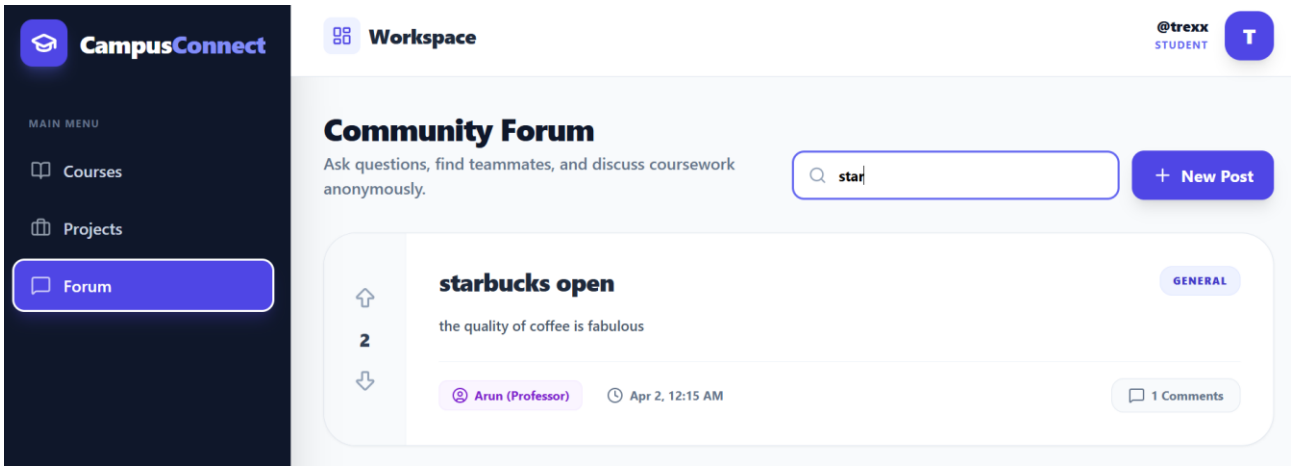
8. Community Forum

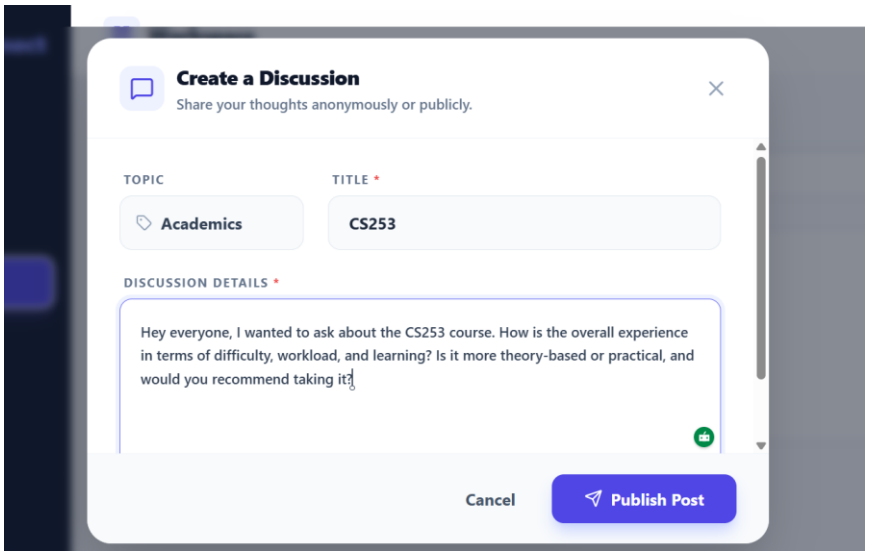
8.1 Viewing and Searching Posts

Users can **view** all posts in the **community forum menu**, where discussions are organized and displayed along with their respective categories. The forum also provides a **search** functionality that allows users to **quickly find relevant posts** by entering keywords such as the **post title** or **specific category**.



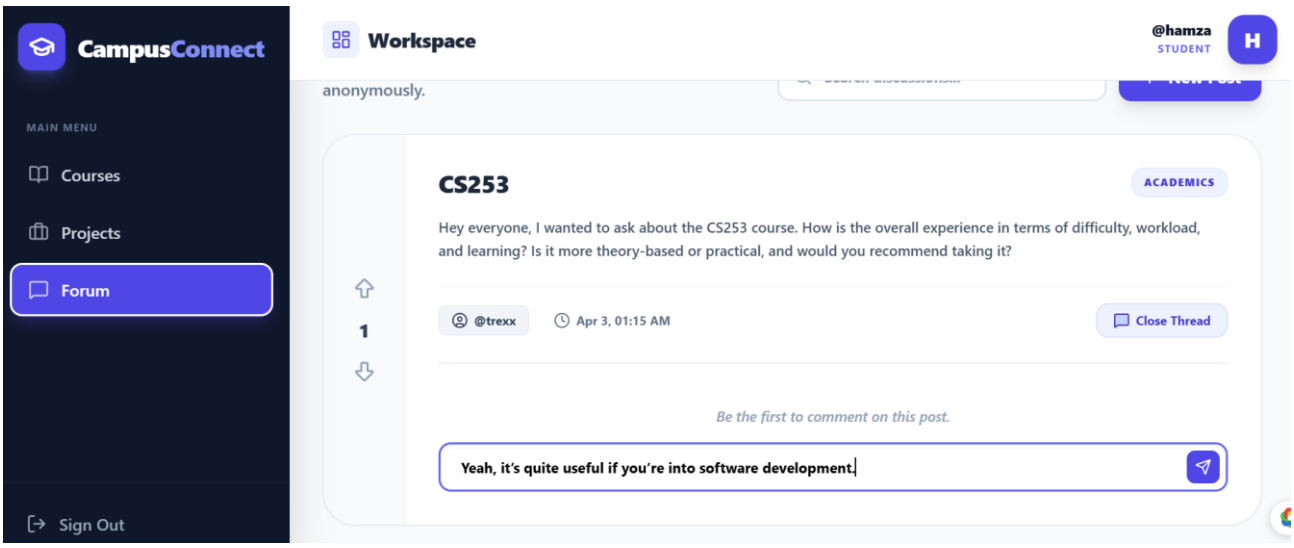
8.2 Creating a Post

Users can create a new post by navigating to the community forum section and clicking on the **New Post** button. While creating a post, the user is required to select a category such as **General, Academics, Projects, Study Group, or Career**, and then enter the **title** and **discussion details**. After filling in the required information, the post can be published by clicking on the **Publish Post** button. Posts created by students are displayed using their **anonymous username**, whereas posts created by professors display their **actual name**.

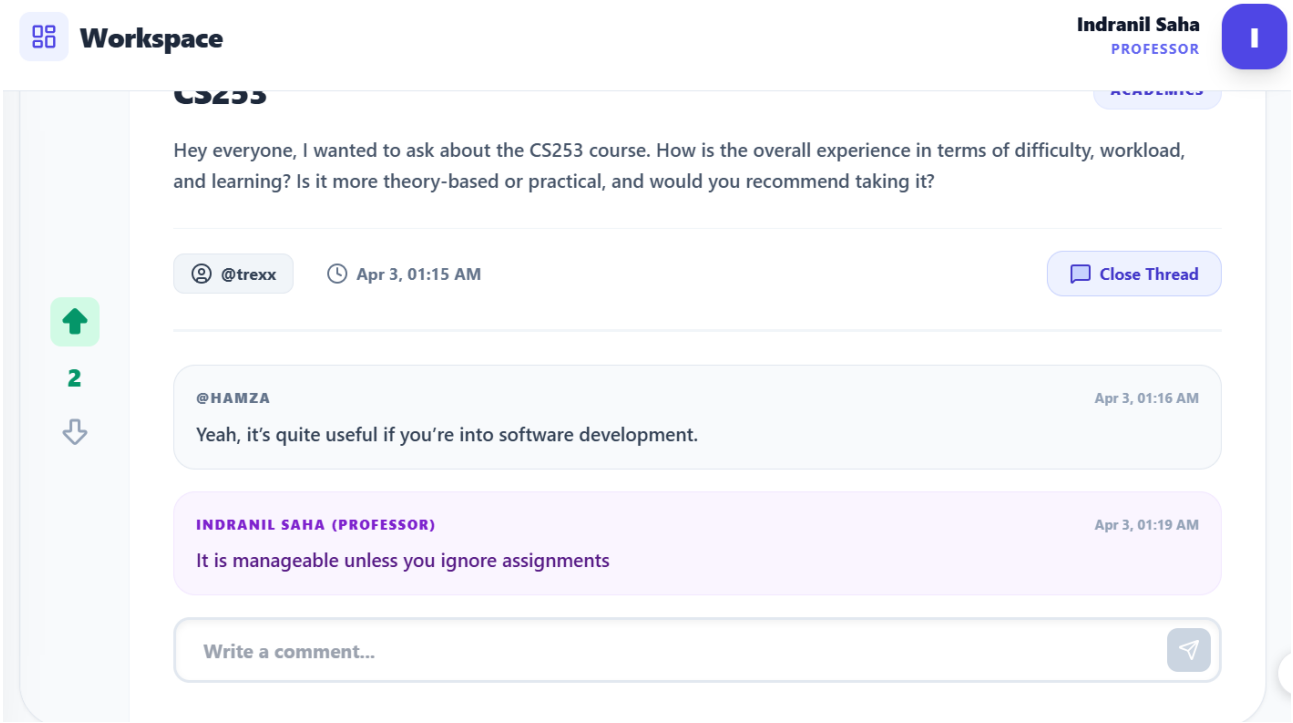


8.3 Replies and Voting

Users can interact with posts by replying to them by clicking on the **comments** button, enabling threaded discussions within the forum. Any user can respond to a post by typing a message and press the **send** button adding a reply under it.

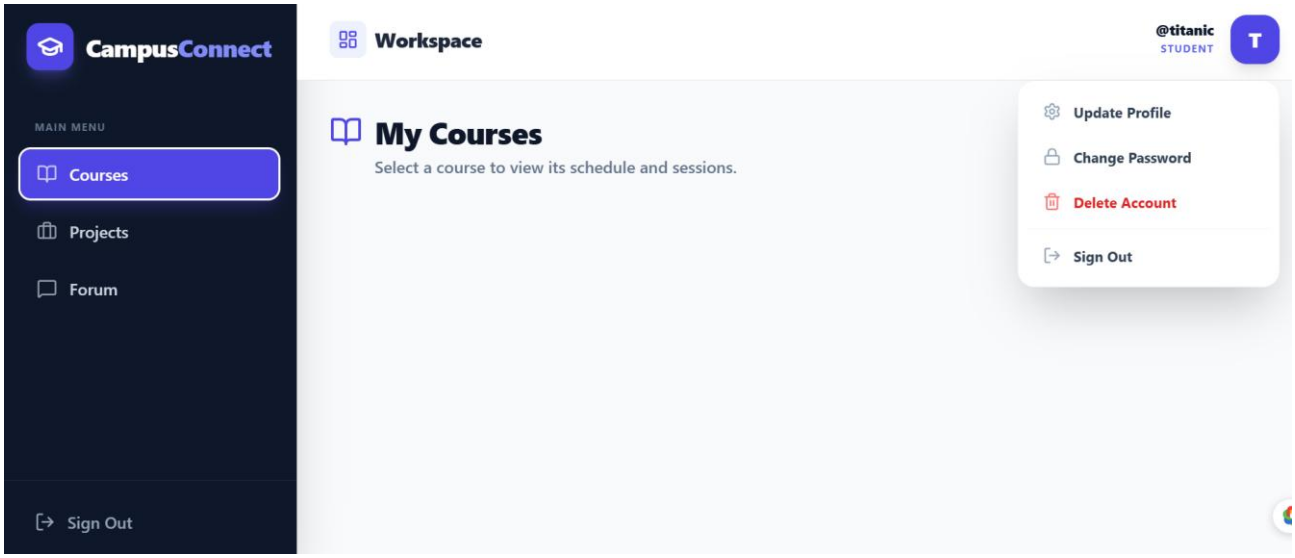


Additionally, the system provides **upvote** and **downvote** options for each post by clicking the **up arrow** or **down arrow** button on each post, allowing users to express their opinion and highlight useful or relevant discussions.



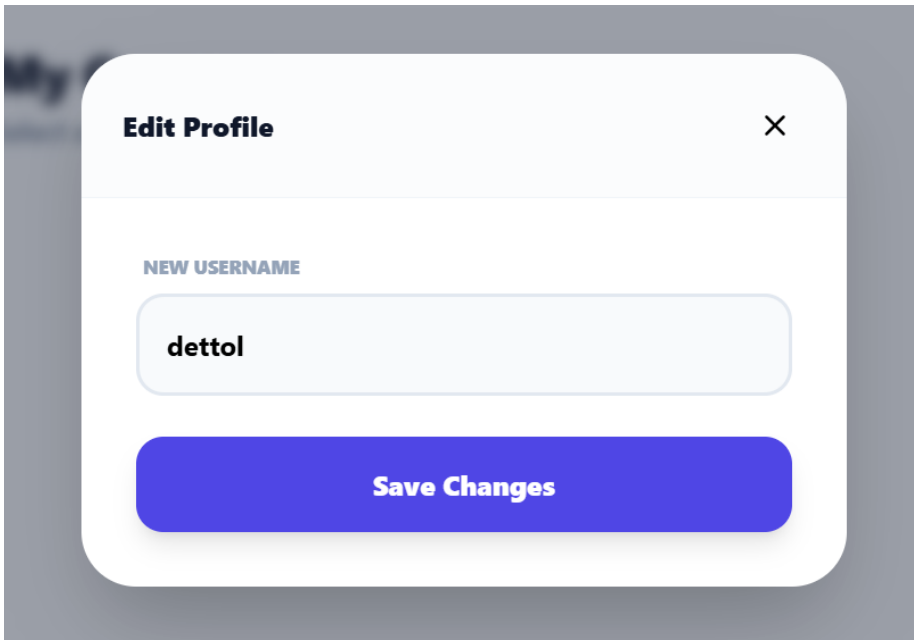
9. Account Management

Users can access account management features by clicking on their **profile icon** available on the dashboard. This section provides options to update account details, manage security, and control account access.



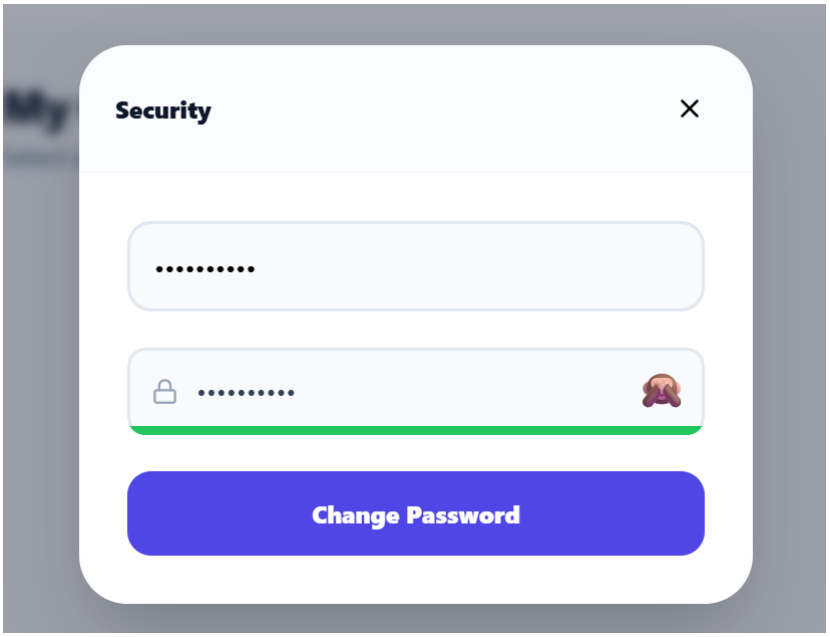
9.1 Change Username

Users can update their username by selecting the change username option from the profile menu. They need to enter the new username and click on the **Save Changes** button to update it successfully.



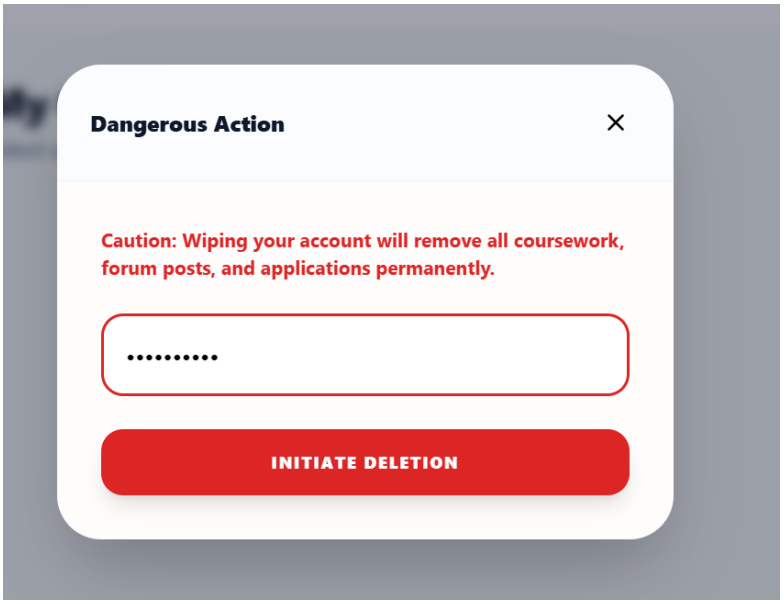
9.2 Change Password

Users can change their password by selecting the change password option then entering their current (old) password and setting a new password. The new password must contain at least 8 characters, including one uppercase letter and one number. After entering the required details, clicking on the “Change Password” button updates the password securely.

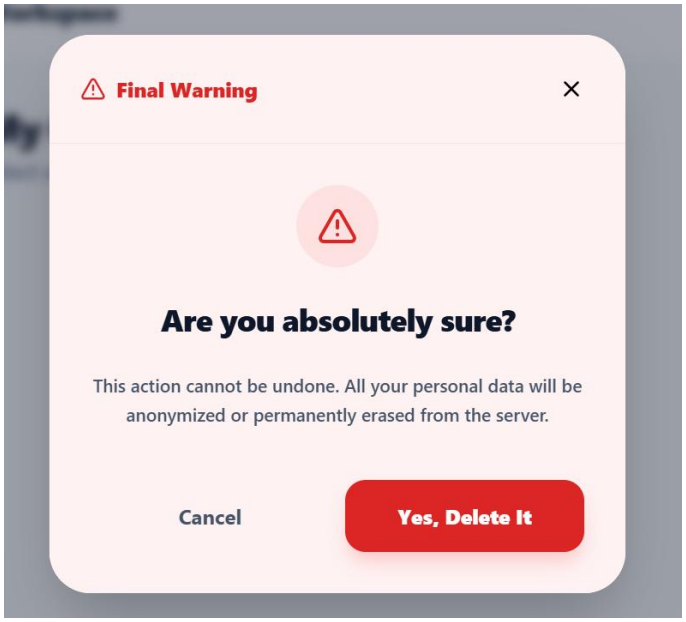


9.3 Delete Account

Users can delete their account by selecting the delete account option. They are required to enter their account password and click on the **“Initiate Deletion”** button.



A confirmation dialog appears asking if the user is sure about deleting the account. Upon clicking **Yes, Delete It**, the account is permanently deleted from the system.



9.4 Sign Out

Users can log out of their account by selecting the sign-out option from the profile menu. Clicking on this option securely ends the current session and redirects the user out of the system.

Appendix A - Group Log

S.No	Date	Timings	Venue	Description
1.	29/03/2026	18:00 to 19:00	Google Meet	Kick-off meeting for User Manual; finalized document structure and assigned roles
2.	30/01/2026	17:00 to 19:00	Hall 12	Drafted "Professor" workflows: course creation, co-instructor assignment, and bulk student enrollment via Excel.
3.	31/01/2026	19:00 to 23:00	Hall 12	Documented "Student" features: Live Discussion interface and the compulsory anonymous feedback system.
4	1/04/2026	18:00 to 19:30	Hall 12	Developed "Analytics" documentation; explained the 5-point categorical metrics and qualitative written remarks.
5.	03/04/2026	18:00 to 20:00	Google Meet	Final review meeting: synchronized formatting, corrected font inconsistencies, and cross-checked UI labels with the manual text.
